10KHZ HF SCS EFFECTIVE FOR CHRONIC LOW BACK PAIN: A 24 MONTH STUDY

Prospective, Multi-center, Observational Study:

Trial

N = 83

IPG

N = 72

24 months

N = 65

AT 24 MONTHS:

Mean Back pain

VAS 8.4 to 3.3

Mean leg pain

VAS 5.4 to 2.3

Mean MED

84 to 27 mg/day

CONCLUSION:

Patients with chronic low back pain have a marked and sustained response to HF 10 SCS treatment at 24 months as demonstrated by reductions in VAS and MEDs. Additionally, there were decreases in ODI, improvement in sleep, and no AEs related to high frequency stimulation.

SUSTAINED EFFECTIVENESS OF 10 KHZ HIGH-FREQUENCY SPINAL CORD STIMULATION FOR PATIENTS WITH CHRONIC, LOW BACK PAIN: 24-MONTH RESULTS OF A PROSPECTIVE MULTICENTER STUDY.
