

INS & NANS Member Benefits

Benefits of Belonging

Click on the following link to access the [Online Journal Portal](#)

Did you know that as a NANS member you automatically belong to the International Neuromodulation Society (INS)?

Through NANS, some of the benefits you receive include:

1. Members receive discounts on annual meeting and educational courses
2. Priority for enrollment in educational courses
3. Subscription to the Neuromodulation Newsletter
4. Opportunities for networking with colleagues and experts within the field
5. Access to the members' only portion of NANS website that includes handouts and downloads from annual meetings.
6. Access to the members' only portion of the NANS website that includes handouts and downloads from the annual meeting Subscription to the International Neuromodulation Society journal Neuromodulation: Technology at the Neural Interface (with the exception of the student/trainee membership)

Through the INS, you also receive these and other benefits:

1. *A subscription to the official INS journal Neuromodulation: Technology at the Neural Interface, including all archived issues, as well as a discount on other titles published by Wiley
2. *Discounts on the biennial scientific congress and access to audio files from past congresses
3. *A product database, a member database, employment opportunity listings, and secure, interactive communication with peers
4. *Downloadable and customizable patient education content, copyright-free images, and related materials (available to the public at <http://www.neuromodulation.com/for-patients>)
5. *Expert Panel sessions on neuromodulation topics, as well as archived sessions, moderated by leaders in the field
6. *The option to be listed in an online, public [neuromodulation directory](#)
7. *Staying up-to-date through the INS newsletter, research portal, chapter website links, and global events calendar, plus daily news briefs about science, industry, and regulatory developments – view the news briefs on the INS homepage, www.neuromodulation.com, or use the [RSS feed](#)

*These items are exclusively for members and require login to the INS Members Only Section <http://www.neuromodulation.com/members-only-section>

[INS World Congress](#)

The International Neuromodulation Society journal *Neuromodulation: Technology at the Neural Interface is the premier journal in neuromodulation. Established in 1998 by founding Editor Dr. Elliot Krames and edited since 2009 by Editor-in-Chief Dr. Robert Levy, the [journal](#) has been MEDLINE-indexed back to its first edition, now appears 8 times a year, and focuses on all aspects of this growing field

***Wiley publishes the journal on behalf of INS and offers exclusive member discounts to some of the publisher's other titles**

*** The INS website** www.neuromodulation.com, provides exclusive members-only materials – and the option to choose to be listed on the public directory – as well as a wide set of patient education handouts and numerous other resources created with the help of volunteer member contributors (to volunteer, contact Public Education and Website Manager Nancy Garcia at ngarcia@neuromodulation.com)

*** An interactive and secure website for worldwide communication with peers and experts**, featuring online moderated question-and-answer sessions, the option to list contact information in a public directory, handouts for patients, healthcare professional information, a global events calendar, daily news briefs, member database, neuromodulation product database, and image gallery.

[The INS World Congress](#) draws clinicians, scientists, bioengineers and members of industry from five continents every two years for a three-day scientific congress preceded by a two-day preference about mechanisms of action, innovation, and industry, and provides the option to receive CME credit for the scientific program; members receive discounted registration for the scientific program
