1. Is the procedure Urgent/Emergent?

2. Is the procedure Time sensitive?

3. Schedule within 4 weeks

4. Is there an effective alternative treatment option that may be implemented for 4 weeks or more without significant decrease in function/mobility?

5. Is the patient at high risk for COVID-19 related illness? (>65, immunocomp, O2, DM, other?)

6. Is the patient’s functional status/pain improved or worsened from baseline?

7. Will post procedure hospitalization/monitoring be required?

8. Is the COVID-19 disease burden of the hospital/community using up extraordinary healthcare resources (“Surge”)?

   - NO
   - YES

   Consider scheduling procedure as available
